INTRODUCTION

TIRAZ ALUMINIUM & GLASS

Openings that bring in light

Alongside wood and interior details, Tiraz carries out aluminium and glass works for homes and commercial buildings: windows, glazed façades, doors, glass rooms, skylights and glass roofs.

This catalogue presents a selection of these works, grouped by type. For each work we show the project photos and describe what can be seen: the form, the frame lines and how the glazing meets the building.

ENHANCED IMAGE

HOW WE WORK

01

SITE VISIT

We start from the space itself: openings, levels and the way the building is used.

02

MEASUREMENT

Openings are measured on site so every frame is made to fit.

03

FABRICATION

Frames and glass are prepared according to the agreed design.

04

INSTALLATION

Our team installs on site, from window frames to rooftop skylight structures.

ENHANCED IMAGE

01

CATEGORY 01

WINDOWS

Window openings in aluminium frames, from single tall windows to repeated openings across multi-storey buildings.

01 Tall Vertical Windows P.05

02 Multi-Storey Building Windows P.06

01

WINDOWS

Tall Vertical Windows

Narrow, full-height windows set into a rendered wall. The slim frames keep the glass dominant and stress the vertical lines of the façade. One of the units is shown with its sash opened.

VISIBLE DETAILS

- Slim dark-finish aluminium frames
- Tall, vertical proportions
- Clear glazing
- Opening sash on one of the units

MORE VIEWS

02

WINDOWS

Multi-Storey Building Windows

Repeated window openings across a multi-storey building. The frame lines run consistently from floor to floor, with framed balcony openings on the upper levels.

VISIBLE DETAILS

- Consistent frame lines on every floor
- Dark frames against a light façade
- Window and balcony openings in one rhythm
- Railings at the balcony openings

MORE VIEWS

ENHANCED IMAGE

02

CATEGORY 02

FAÇADES

Large glazed façades where aluminium framing defines the elevation, with doors integrated in the same frame lines.

01 Twin Glazed Façades P.08

02 Glazing in a Stone Façade P.09

01

FAÇADES

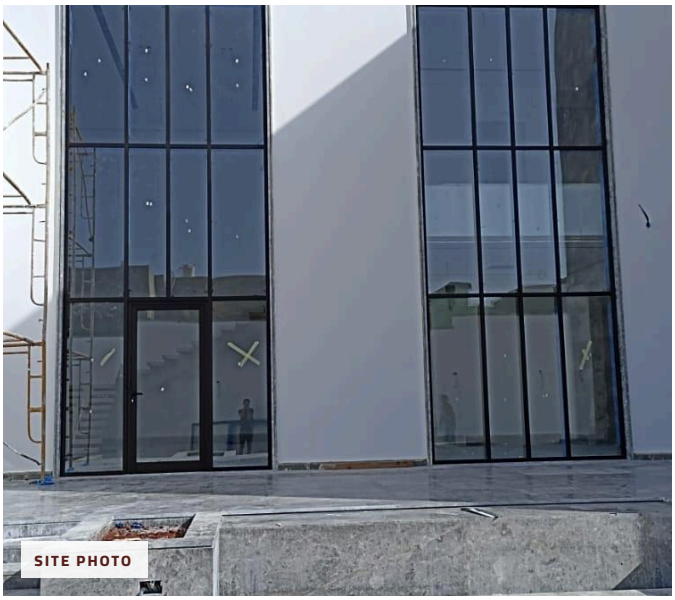

Twin Glazed Façades

Two tall glazed façades side by side on a white building. A grid of black frames divides the glass horizontally and vertically, with an entrance door built into the base of the frame.

VISIBLE DETAILS

- Full-height glazing
- Black frame grid with horizontal and vertical divisions
- Entrance door within the façade frame
- Sky reflected across the glass

MORE VIEWS

02

FAÇADES

Glazing in a Stone Façade

A two-storey commercial building with wide glazed openings on both floors. Tiraz carried out the aluminium and glass openings; the stone cladding is part of the building.

VISIBLE DETAILS

- Wide glazed bays on two levels
- Openings aligned floor to floor
- Dark frames set within the stone
- Shop-front scale glazing

03

CATEGORY 03

GLASS ROOMS

Rooms and enclosures opened to light and view through full-height aluminium and glass walls.

01 Room with Two Glass Façades P.11

02 Garden-Facing Façade & Door P.12

01

GLASS ROOMS

Room with Two Glass Façades

A long room opened on two sides with full-height glass walls in black aluminium frames. The glazing brings daylight deep into the space and frames the view outside.

VISIBLE DETAILS

- Floor-to-ceiling glass on two sides
- Black aluminium frames
- Door opening to the outside
- Continuous frame lines along the room

MORE VIEWS

02

GLASS ROOMS

Garden-Facing Façade & Door

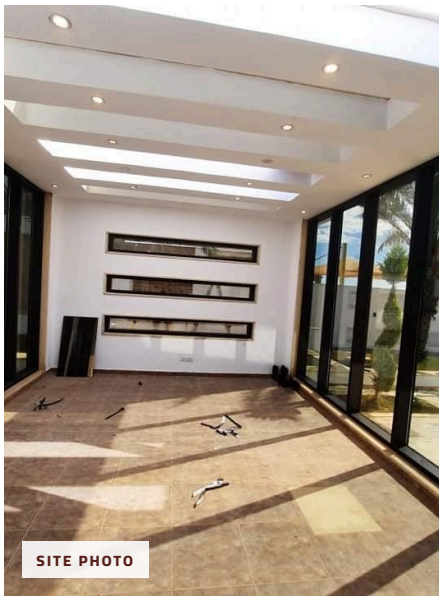

A glazed façade facing the garden, with the door set into the same frame lines so the elevation reads as one composition.

VISIBLE DETAILS

- Door integrated in the glazed façade
- Divided glass panels
- Black frame finish
- Outlook to the garden

04

CATEGORY 04

SKYLIGHTS

Pyramid skylights, extended glass roofs and sloped glazing that bring daylight from above.

01	Pyramid Skylight	P.14
02	Extended Glass Roof	P.15
03	Sloped Side Glass Roof	P.16

01

SKYLIGHTS

Pyramid Skylight

A four-sided pyramid skylight on a rooftop. Aluminium ribs divide the glass into panes and meet at the apex; from below, the skylight opens the room to daylight.

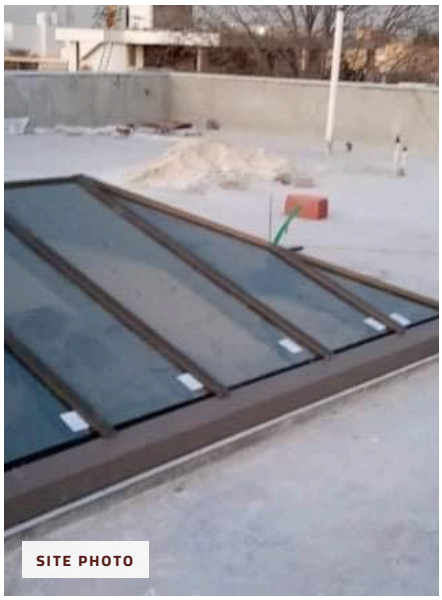

VISIBLE DETAILS

- Four-sided pyramid form
- Glass panes divided by aluminium ribs
- Dark frame finish
- Daylight into the room below

MORE VIEWS

02

SKYLIGHTS

Extended Glass Roof

A long rectangular glass roof with a regular rhythm of glass panels, framed in dark aluminium with glazed side panels.

VISIBLE DETAILS

- Regular rhythm of glass panels
- Dark aluminium framing
- Glazed side panels
- Long, linear form

MORE VIEWS

03

SKYLIGHTS

Sloped Side Glass Roof

A single-slope glass roof running along the edge of a wall, framed in aluminium.

VISIBLE DETAILS

- Single slope along the wall
- Glass panels in a framed grid
- Aluminium frame finish
- Daylight along the edge of the space
